

3 minute presentation

Does luck exist?

- Baader-Meinhoff Phenomenon

- ↳ things you are looking for will seem more prevalent, (look for red lights, "special numbers")

- Insane probability, but someone HAD to win eventually.

- ↳ people spend TONS of money on the lottery everyday. When people win the lottery it's seen as lucky, but in reality it makes sense someone will eventually win.

- People who often get "unlucky" are either pessimistic or have unrealistic standards for what the avg. person goes through.

- ↳ my buddy zach gets "unlucky" or his opponents get super "lucky" while playing games.

Hook: I don't believe in luck. You either can do something about your situation, or you're ignoring reality.

Topic: does luck exist?

Hook: I don't believe in luck.

Whatever situation you're in, you can either do something about it, or ignore your reality.

"unlucky" people → a disguised version of "why me"
↳ "lucky" people could have worked for it.

Probability does as probability do

↳ Someone has to win the lottery eventually, it's just how statistics be.

When you seek out certain things, they will show themselves → Baader-Meinhoff

Don't ruin it for others,

nobody wins.

(unless they are
annoying about it.)

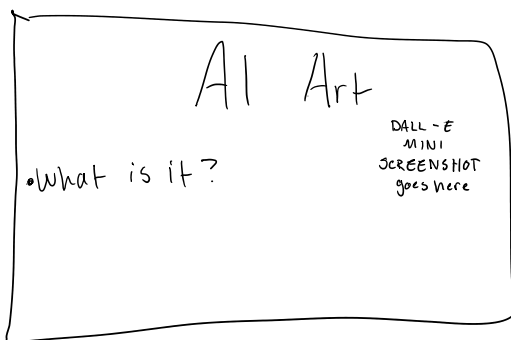

Different styles of AI just for ART:

- Dall-E | generates image from word prompts
- Dall-E outpainting | expanding pre existing images using AI and iterative design
- NVIDIA Real Painting thing | lets you draw a nature scene with extreme detail
- Stable diffusion | image to image → draw a sketch, turn into something better
- OpenAI prompt writer | "I made an AI read _____ and create a _____" style AI generation
- Deepfakes → both video and audio (Elon Musk ad)
- is typing in keywords and having AI make art REALLY art? | guy who won art contest with AI

Lo-fi girl ← AI music?
???

→ how can AI be used for ART?

- ↳ y'all have probably seen Dall-E Mini memes, those are AI generated (prompt generated topic)
- ↳ deep fakes, Corridor Digital movie trailers, memes again, the Elon Musk Ad (video / audio trained)
- ↳ NVIDIA CANVAS → using your own hardware to run AI systems

- AI art can come in many forms
- Dall-E, Dall-E 2, Dall-E mini
- Deepfakes of people in video, corridor digital
- Deep Fake of audio / ai generated tts - tiktok tts, ai voice thing I did - corridor digital

AI ART

• How does it work?

piece of
AI gen.
art goes
here

- Generative Pre-Trained transformer 3 has 175 billion parameters
- AI models are trained with billions of models consisting of pictures of pretty much anything & everything along with descriptor text. This allows the model to create a link between images and words which is why dall-e works.
(Along with a whole wack of a lot more)
- AI voice and video is the same way, but instead of coming pre-generated, YOU (or some company) uses pre-existing audio/video/images to train a model that after enough time & computation power can create your very own deepfake! (the more data the better)
- Nvidia CANVAS uses your own graphics card to turn a rough drawing of landscapes into a realistic landscape trained from a pool of over 5 million pictures of landscapes

<https://www.instagram.com/p/Ch45WyoJ3MS/> → walking moving AI (plus some tom Reeler)

<https://www.instagram.com/p/Ch49yH0AMiW/> → prompt generated ART, extremely high quality

Ethics Group 3

October 3, 2022 10:43 AM

'People seem to get promotions & opportunities for overtime based on whether people liked them, not the quality of work'

↳ general statement (retract)

↳ loyalty to co-workers, protect from new boss

↳ could be a passive aggressive statement directed @ new boss (same position from outside of job) | believes he should have got promotion

↳ not ready to narc

↳

- why did Steven say that

- Kristin's behaviour

Steven is wrong:

↳ something is wrong but won't narc

↳ unprofessional language

① Hook:

Kristin is wrong:

↳ ultimatum - no good option out

↳ maybe seems personal

if intention → what should Steven do.
(flow chart)

ASET # 3, 4, 7, 8, 9 (HR)

↓
Steven

② Explain Scenario

Obligations

- elaborate comment → double down
- apologize → retract/clarify your meaning
apologize for how he said it
↳ clarify →

Personal:

hook @ our new boss

should be you,
and now she's
threatening your
job.

Obligation to self > Code of Conduct

Thesis

Scenario - analyze

Ethics rule it breaks }
mistakes made } together
what should be done
